Advance notification of the proposed listing of the West County Road 112 site.

The RI/FS task order was funded in September 2010 and the draft plans are due October 27th. The initial sampling event of the private wells is scheduled for the week of November 29, 2010, and monitoring well installation should begin in early December. The focus of the initial well installation will be on the identification of the source area and the leading edge of the plume.

Thanks.
